## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Applicant is advised that the Notice of Allowance mailed 3/27/03 is vacated. If the issue fee has already been paid, applicant may request a refund or request that the fee be credited to a deposit account. However, applicant may wait until the application is either found allowable or held abandoned. If allowed, upon receipt of a new Notice of Allowance, applicant may request that the previously submitted issue fee be applied. If abandoned, applicant may request refund or credit to a specified Deposit Account.

2. Prosecution on the merits of this application is reopened on claim 6 considered unpatentable for the reasons indicated below:

#### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mangolds (WO98/54538) and Miller (US Patent # 4,154,012). Mangolds discloses a non-killing cartridge (reference 15) to be fired by a firearm (within a barrel) and packed in a shell (reference 12). The device includes a plurality of weights (references 18-32), which may be of a bean bag type structure (page 7, lines 21 and 22) connected to each other. Bean bag type structures are known to be cloth bags normally filled with small cylindrical particles. Although Mangolds does not expressly disclose the bean bag type structures filled with metal shot, Miller does. Miller teaches that cloth bags filled with shot are known for riot control of non-lethal type (column 1, lines 11-

Art Unit: 3641

13). Therefor, to modify the Mangolds device to specify the use of metal shot within the bean bags would have been considered an obvious modification to those skilled in the art at the time the present invention was made, particularly since Miller shows the known use of bean bag type structures filled with metal shot for various purposes and metal shot would therefore just be another alternative filler material for the bean bags of the Mangolds device.

*Allowable Subject Matter*

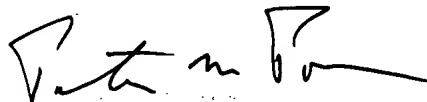

5. Claims 7-15 are objected to as being dependent upon a rejected base claim, but would possibly be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
